

Centro Ghe-Pel-Ling

To whom it may concern

Our center is a buddhist center following the Tibetan tradition of teaching. It has been established in Milano in 1977, and since then it has operated seriously and continuously as a cultural center, dealing mainly with philosophical and psicological subjects.

We entered in contact with the teaching and the thought of Bagwan reading some of his boooks and contacting peoples in some of his centers, and also listening some conferences.

Even if we follow different phosophical schools, we we are certain that the thohght and the teachings of Rajnish can be very beneficial for all positive human beings.
