Dr. Med. Heiner Klaus
Prins Hendrik Str. 64
Egmond
HOLLAND

TO WHOM IT MAY CONCERN

I have a consultation practise for psychosomatic diseases since 1978 in Egmond, Holland. Born in Germany I graduated from medical school in Munich, Germany, where I had my residential years. A 2 year training in psychiatry and psychology in the Dutch Psychiatric Hospital Loosduinen gave me insights into the inter-relatedness of psychology and physical illness, so I started to set up my practise.

Being professionally interested in psychology - publications I came across the religious books of Bhagwan Shree Rajneesh. His talks on the relationship of body-mind-soul, come from an exceptional level of consciousness and transmits insights that scientific research has not yet discovered. This established Bhagwan as an outstanding figure in the field of psychology. On the interrelatedness of the psychic unconscious illness and its expression on the physical plane, he has genially designed a number of meditation methods that help people to be cleansed and heighten their level of consciousness.

I suggest these techniques (Meditations) to my clients with excellent success and they are a valid tool in psychotherapy and psychiatry. Furthermore He offers a new level of awakesness and "weltenschauung" to both the therapist and the client that goes beyond psychology into the reach of religion. He is the first Mystic in human history who has a chance to create a religion while still alive and exercise a worldwide spiritual influence.

Sincerely,

(Dr. Heiner Klaus)
