1115 SW 11th Avenue,
PORTLAND OR. 97205,
UNITED STATES OF AMERICA

TO WHOM IT MAY CONCERN.

I write in support of Bhagwan Shree Rajneesh.

I am Managing Director of Energy Research Group Pty. Ltd. of Australia - a company dedicated to Research, Development and marketing of high technology internationally.

I have qualifications in economics, commerce, psychology and environmental management. I have been director of numerous companies and a member of several government advisory and administrative boards.

For twelve years my career centred around environmental issues and included supervision of general ecology research and protection programs and the interaction between man and his environment.

In 1980 I was introduced to the philosophies of Bhagwan Shree Rajneesh and have found him to have a unique and most advanced, balanced and practical approach to environmental care, and human psychology.

I have no hesitation in saying that Bhagwan presents the most sensitive and workable approach to a harmonious relationship between mankind and his environment that I have encountered.

EXHIBIT "A-181"

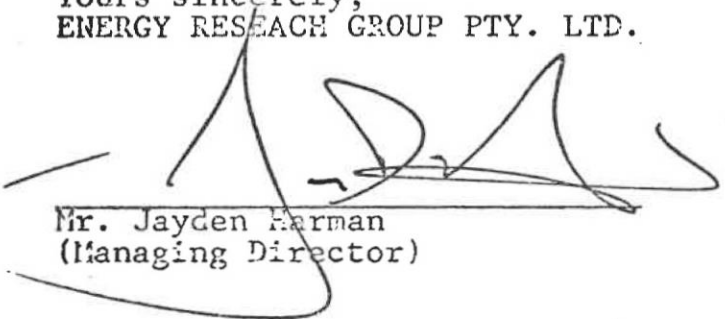

.../2

He has my full support in his efforts and I urge all authorities to recognise and endorse him as a man of exceptional vision and capability.

The United States is indeed fortunate to have the contributions of such a man.

It would be an error of the gravest nature not to foster his work.

Yours sincerely,
ENERGY RESEARCH GROUP PTY. LTD.

Mr. Jayden Harman
(Managing Director)
