

Prof.
Claudia Jesi
Piazza St. Ambrogio 16
I-20123 Milano

Lugano, July 21 1983

To whom it may concern:

I graduated in Architecture in 1969 at the "Politecnico" University in Milano.

For a period of 10 years I was teaching Applied Arts in an Italian High School and worked as a professionalist of Interior Design in a Studio in Milan and New York City as well.

After a serious illness, I approached the world of Yoga and Meditation. In that period I got acquainted with the Meditation techniques of the enlightened Master Bhagwan Shree Rajneesh. These meditations have been of great help to express my creativity particularly in my work and in relation with the outside world.

Bhagwan Shree Rajneesh is a great philosopher and His eclecticism allows everybody to feel in contact with Him. To be near a great spiritual Master nowadays is something really extraordinary.

The city His disciples are building in Oregon is a perfect model of a new Town-planning, one of the most advanced in the world.

It's a great experiment to express a truer and more harmonious way of living for the whole humanity.

Yours faithfully

Claudia Jesi
