To whom it may concern

July 19th, 1983

At first let me introduce myself. I am an electronic ingeneer with diploma of the Swiss Federal Institut of Technology in Zurich. After I got my diploma I immediately started working in a sister of the ITT-Concern, Standard Telephon & Radio AG in Zurich. During 10 years I was working there as a software system analysit in the development departement. At that time I heard first about Bhagwan Shree Rajneesh and was immediately sure that this is the man who can halp me to live my life better than I was doing it before. So I became in 1979 a disciple of this wonderful man.

Bhagwan Shree Rajneesh taught me to see a new dimension in my life and in my work. Now I am a correspondence teacher in the Programming language BASIC. It would make me very happy if Bhagwan Shree Rajneesh could stay in the United States of America, a country I admired very much.

I am writing to ask you to help Bhagwan Shree Rajneesh to stay in the United States of America.

Hoping that you do your best, I remain

faithfully

J. Schlegel
