To Whom it may Concern,

I am a retired wife of a former Dr. of Medicine, living in Laguna Hills, Leisure World.

I wish to protect the effort to expell Bhagwan from our country on the grounds that he is not a religious leader. He has been recognized as one of the leading religious leaders in India and around the world for years..

He has written many inspirational books, published in many languages. The U.S. would be put in an absurd position if we followed the idea of expelling him from our country. Although I am not one of his followers I believe in our Constitution and Freedom of Religion. Sincerely, Hortense Gruber
