July 14th., 1983

To whom it may concern,

I am a Social Worker with four years varied practical experience. I have a Bachelor of Arts Degree from the Australian National University (1975), and a Bachelor of Social Administration Degree from Flinders University, South Australia (1978). I have worked for three different State and Federal Government Welfare Departments in a wide range of general Welfare and Supervisory positions. I am currently tutoring in the Social Work area at the South Australian Institute of Technology.

My first contact with Bhagwan Shree Rajneesh occurred about eighteen months ago through my mother who had become a Sannyasin. Since this time Bhagwan's insights in to the psychological and spiritual nature of people's problems has helped me tremendously in making my work with people and their problems more effective. My work now includes a spiritual component that was absent previously, and is thus more holistic in its approach.

My own contact and participation in Bhagwan's meditations has also enabled me to both survive and be more productive in an area of work that is renowned for worker 'burn-out'. Without my contact with Bhagwan I would not currently still be working in this profession, despite many years of training and preparation for it.

Both personally and professionally I can attest to the exceptional ability of Bhagwan's teachings and religious guidance.

Yours sincerely
