

Groningen, July 1983.

To whom it may concern,

I, Tjipkje Petronella Faber, also known as Ma Prem Vijaya, have a degree in Medicine and Developmental Psychology. I went to Highschool when I was 12 and after this to University when I was 17 years old. After 6 years of theoretical study in medicine and social psychiatry I decided to get further with developmental psychology because I wanted to work more with children in problem situations.

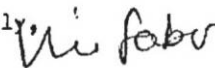

Through people who were working with psychotherapy I heard 7 years ago about Bhagwan Shree Rajneesh and I started to read his books. I was very impressed by his vision, it learned me in various ways to look at things from another point of view as I was used to hear. In my own field of medicine and psychology Bhagwan can be an amazing eyeopener. For example, what he has said about modern disease like cancer and hypertension, may lead to a whole new scientific approach.

Right now I am working at a University Hospital at a research department for neurological development. (I have to write a thesis about the verbal mother-baby interaction). In this field also Bhagwan is bringing something really new, something which places a whole field of scientific research and literature in a context which is so broad, that it gives perspectives which would not happen otherwise.

In my opinion and experience Bhagwan will mean a lot to the future scientific world.

The above is within my knowledge and belief, and if called upon I would competently testify thereto.

Yours sincerely,

T.P.Faber.

T.P.Faber (Ma Prem Vijaya)  
Menkemaheerd 8  
9737 LD Groningen  
Holland

Seen for legalization of the signature of Mrs. Tjipkje Petronella Faber, residing in Groningen, the Netherlands, 8 Menkemaheerd, by me mr. Egber Rudolf Bossinade, notary, residing in Groningen, the Netherlands, on this 20th day of July nineteen hundred and eighty three.
