

TO WHOM IT MAY CONCERN

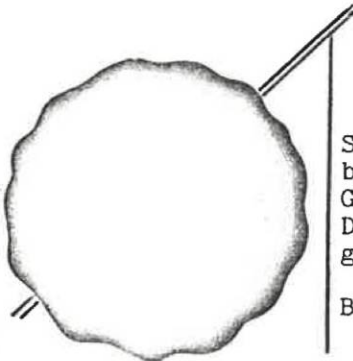

My name is Alphonse Delnooz, I was born 5-2-1957 in Maastricht, Holland.

I have recently received a PhD degree in Orthopsychiatry at the University of Nijmegen, Holland. I have specialized in working with adolescents with behaviour problems, clinical psychology and personality theories. Recently I have finished an extensive research project on runaways. The findings of this project are or will be reported in two books and a dozen articles in national and international professional and semi-professional journals.

About a year ago I became a disciple of Bhagwan Shree Rajneesh. To my opinion the value of His work can be shown from many different sides. Let me say something as orthopsychiatrist about this value. Bhagwan Shree Rajneesh has developed a unique theoretical model on human personality. In theory and practice of health service there was a deep need for a model that integrates body and mind; ratio, emotions, behaviour and body. Rajneesh's model has fulfilled this need in a fascinating way. His model is very broad, but still specific and clear. Besides that, Rajneesh and those who worked with His inspiration have developed a great number of techniques, based on the model.

The works published by Bhagwan Shree Rajneesh have a depth, a clarity, a logical consistence that is outstanding. I am convinced that his impact on the field of health care in the coming decennia will be enormous.
