To whom it may concern

I am 34 years old and a disciple of Bhagwan Shree Rajneesh. I am also a German teacher. I studied English and French literature at the University of Göttingen in West Germany and after six years took my degree, Erstes Staatsexamen "summa cum laude" in 1973. I then studied the didactics of these languages for two more years and took my next degree, Zweites Staatsexamen in 1975. I then took up teaching as a Studienrätin in Mainz. Wanting to understand my pupils more fully and thus become a better teacher I started taking an interest in psychology and read a lot of books on these subjects. I soon realized that in order to understand people better as I would first have to learn about myself and so I started doing various psychotherapeutic groups. This is how I first heard about Bhagwan Shree Rajneesh. I soon found out that psychotherapeutic groups led by saanyas therapists are far more intense and effective than any other groups. Bhagwan's deep insight into the nature of man and his love for all of us inspire the therapists in such a way

that their work just achieves more.

Parallel to doing groups I started reading Bhagwan's books and was amazed at his great knowledge in every field of psychology. I honestly think that all this has made me a better teacher. I understand my pupils better and can thus teach more effectively. I was appointed Ober-Studienratin half a year ago.

During my stay in Rajneeshpuram in July 1983 I came to realize the wonderful work that is happening there in any field - whether it be in the therapeutic work that is happening there or in the preservation of nature. All this is inspired by Bhagwan's love and we need him and his silence in this very place. Something wonderful is happening here and we do want and need it to go on.

His blessings

Ma Sunder Arinasho
