To whom it may concern:

In 1978 I became a M.D.; after that I followed a course for general practitioners but in 1979 already I started working with homeopathic medicines as an assistant.

Since 1982 I have my own practice, where I am working together with an acupuncturist, a manual therapist and a haptic-therapist.

Always I had been interested in natural universal laws, macrobiotics; in 1970 I met Bhagwan Shree Rajneesh via his book and a great "Oh..." came out of me.

I felt honored and I felt that it must be the way. Bhagwan represents for me Truth and Love; a man who knows about the deeper quality of life and can speak about it very simply, clear and direct. For me He is someone like Jesus. Therefore for America, it must be a great honor to take care of him well.
