

To whom it may concern

I have been a disciple of Bhagwan Shree Rajneesh for five years and it seems like fifty because of the intensity that He is giving to my life with His presence here.

When one comes here at Rajneeshpuren from the outside is immediately involved in this energy of ermony that fills this place with an incredible, new and unexpected way of life, way of love, awareness, sensitivity and intelligence.

I am a student of Architecture, my studies are almost completed and here I found that the presence of Bhagwan has given a new flavour to both material and artistic worlds, especially to Architecture and wide planning, combining ecological aspect and enrichment of the nature with the maximum in confort and technology.

A real Master as Bhagwan is now giving me a larger vision of life in all its aspects and that is of immense value for my personal growth and my work.

His silence is light in the darkness of our uncounscious life and His presence here, now is the greatest gift that existence can give us.

For this I feel grateful.
