Physician

Bonnensstr. 24

7447 Aichtal / W. Germany

To whom it may concern

I am a physician working since 7 years in various medical departments such as pediatrics, anesthesiology, surgery and before all gynecology and obstetrics. The last two years, I worked in the department of gynecology and obstetrics of the Filderklinik near Stuttgart / W. Germany, totally dedicated to natural childbirth and anthroposophic medicine. Departing from anthroposophic medicine and looking for the most human way of medical treatment and hospital environment as well as searching for new ways of preventive medical care, the work of Bhagwan Shree Rajneesh is able to provide a total change in the hospital environment towards a loving and caring atmosphere most needed for recovering as well as the most radical and comprehensive psychosomatic approach to the whole field of medicine, I ever met. It is difficult to find better ways of stress reduction as the meditations of Bhagwan Shree Rajneesh.

Personally, I came into contact with Bhagwan through his religious books and most of all through my personal experience in human potential groups.

At the moment a growing number of physicians, all over the world is becoming aware of the exceptional contribution of the teachings of Bhagwan to improve psychosomatic illnesses on a large scale. The first physicians offices based on the teachings of Bhagwan are already set up, clinics and obstetrical departments will follow all over the world.

In my professional opinion, the contribution of Bhagwan Shree Rajneesh to medicine is of extraordinary importance.
