To whom it may concern

Living here at Rajneeshpuram around the presence of Bhagwan Shree Rajneesh is something very very special. I was heading for medicine after high school with this longing of being helpful and sharing my life and here I am sharing my life with a Master and being helped. I share more, to receive more. Had I had missed this opportunity, I'd probably be a doctor, may be successful but heavy disheartened and empty in the heart.

Love is the milieu we're moving in in Rajneeshpuram. I've been electrician in a very big company, lifetime electrician was offered to me but it was working. Being around Bhagwan working became playing. Told me I'm going to be on a project that is going to involve 365 hours a day and this for 52 years of the month I'll go for it like a kid humming butterfly. His presence makes the disappeared. The so wanted, search and research fountain of life, He is.

Being out doors for His silence is quite amazing to me as it is the hardest that one can do on oneself. Have you ever try to sit silently doing nothing? Even when the body look calm, the inner in the chaos the mind is so noisy, so junky --- all these thoughts --- not even making sense -

Living around him is a lifting experience - a real physician He is. That

His Being we go beyond the fear of death, doing so life takes a joyful turn. Meditation and the silence following it are the first medicine that is available to human being. A physicist He is. We've been benefited by Newton's law of gravity $F = k \frac{Mm}{D^2}$. Here out of His fragrance that is spreading more light and shining within us and from it a new law is being achieved, the law of grace.

However long it took to get this light shining within, the more of us have and the less time it takes to a new disciple to get it. Things are happening in exponential figures. Sharing was the motion in me, what I'd like to share the most now is my Master Bhagwan Shree Rajneesh.
