

Medina Rajneer
Herringswell,
Bury St Edmund
Suffolk,
England.

27th July 198.

To whom it may concern,

I am a State Registered Nurse, with a Health Visitor Certificate, which I obtained at Hull University in 1968. For eleven years I worked in England as a Health Visitor, running a Community Health Care scheme; specializing in cases of child abuse. During these years of tremendous hard work, the problems were becoming worse, the cases increasing and there was no solution.

The individuals concerned, di

not want to behave in this way but help and treatment in most cases proved ineffective. Trying to change people's behaviour, from the outside does not work.

Since meeting Bhagwan Sh Rajneesh, in 1979 and living in communities with Rajneeshes, the problem does not even arise living in a totally new way, in a way inspired in us, by this exceptional man of compassion and acceptance it would actually be impossible for someone to behave in a violent way toward a child, or anyone else. His knowledge of man and his behaviour, is so deep and encompassing that any work done in Rajneeshpuram or any Rajneesh commune affects

the deepest quality of one's life.

Such a man with such great gifts, is a great asset to any country; however developed societies are, neurosis exists and violent crime is a symptom. The development and personal growth and transformation that happens under the guidance of Bhagwan Shree Rajneesh, is so incredible, that it will affect all who come into contact with it.

This is for me the only way, that I can see, to stop man inflicting pain and misery upon himself and upon others.

We are so lucky to be alive at this time, when such a man

is here and available for us;
and America is lucky to
have him living there.

Yours Sincerely
Prem Prabhakar.
