TO WHOM IT MAY CONCERN

At Manchester University I was awarded an Honours Degree in Electrical and Electronic Engineering in 1974. The next three years I spent in research at Newcastle University. I then worked in Industry for three years as a designer.

During this time I became interested in the spiritual side of life and discovered the religious books of Bhagwan Shree Rajneesh. There I found an extraordinary clarity of thought and a remarkable sensibility.

I found in my own life that after applying Bhagwan's philosophy I am able to be much clearer and more creative in my engineering ability. I noticed that His meditation techniques have made me more centred and calmly objective in emergency situations.

I see Bhagwan as an exceptional person of world renown. He is making an outstanding contribution to human thought.

Yours faithfully

ANTHONY PLEACE
