TO WHOM IT MAY CONCERN

I studied child care-and have been working in a kindergarden, in a hospital, in a birth clinic and last year with a family and their two children.

I first heard about Bhagwan Shree Rajneesh by reading different books. My interest rose and I participated in some meditations offered by one of the Rajneesh Meditation Centers. Soon afterwards I became a sannyasin.

Through my work I involved myself deeply with children's education. Bhagwan Shree Rajneesh helped me to understand the problems of children and their parents much better and hence my work has improved very much. I am now able to be more open and understanding, supporting the children's creativity which generally is being repressed.

For me, Bhagwan is an exceptional outstanding teacher and Master. His teachings have a tremendous impact on man and I therefore hope that the people in the United States will grant Him permission to stay in their country. His love is of tremendous importance in these difficult times.

Very truly,

Ma Amrit Habiba
