To whom it may concern:

In January '83 I received my Ph.D. degree of the University of Munich, since then I'm working in a company for public relations.

I'd like you to know how much the teachings of Bhagwan Shree Rajneesh influenced my studies, mainly on the subjects of Philosophy, European History and Political Science. Since I came across his interpretations no university curriculum anywhere, in Germany, England or Italy, was comparable to his view of human mankind.

His outrageous understanding of almost every subject, I came in touch with, led me to a new complex way of looking at them, realizing the

deep connection of psychological, philosophical as well as social and technical problems.

More than that, his teachings of human psychology are an enormous benefit to the work I'm doing right now and helped me a lot in relating to people for any purpose.

Visiting Rajneeshpuram gave me the chance to experience the incredible value of his presence, uncomparable to anything else.

His presence means to me a tremendous potential to give benefit on all levels to everybody who is open for it, not only individually, more than that is his vision of the new man, the offspring of a cultural and economical as well as religious new birth.

No person, no country should miss to take his presence as a contribution for a future which is worth living in.

Sincerely yours

Claudio Alamy
