TO WHOM IT MAY CONCERN

Bhagwan Shree Rajneesh's stay in the U.S.A. is at the moment
a precious point for all sannyasins and many people in the
world. Using the silence and His presence as the major
aspect for leading his disciples - many doubts have arisen
by the responsible people, who are concerned with his visa.

Before I came to Bhagwan - 1980 - I was studying for many
years psychology, sociology and education and was using
also many techniques for discovering my own self or truth -
like practising yoga, doing Zen meditation and primal
therapy. Before I went to Poona I was teacher in a high
school, mother and housewife.

The first time when I read books of Bhagwan at once my feeling
was, that he is a really outstanding person with such a
tremendous insight, who has combined so many various aspects
like religion, science, art, love, meditation harmoniously.
But to come in contact with His presence, like I have done
it in Poona staying in this energyfield, having Darshan,
hearing His discourses and sitting silently with Him during
Satsang was much more than I ever could expect. It changed
my whole lifestyle and understanding of life. I never
could feel so much love and understanding than staying with Him
and it seems that it is going deeper and deeper. Words cannot
describe the depth that I felt and went into, when I was in
satsang with Him during the festival last year and this year
in Rajneeshpuram.

Worshipping here, I could feel that the people here are
creating a commune with so much love, care and understanding,
that is only possible because of being in a deep communion
with a Master. His silence is such a creative force here,
that anyone who is sensitive and open can feel it and enjoy it.

I feel that Bhagwan Shree Rajneesh's stay here in the U.S.A.
is a great support and gift to the country and His citizens
because of His extraordinary wisdom and knowledge about art,
science and religion.

Sincerely yours,

Ma Gyan Sambava
