To whom it may concern

I heard of Bhagwan Shree Rajneesh in 1979 through my eldest daughter and reading His books I was fascinated of His outstanding competence in education and psychology.

Being a teacher in the vocational education field since 24 years with a diploma from the Art-Academie in Zurich, my professional experiences include also working as a fashion-designer for newspaper and factories, and devising vocational training programs in Turkey.

Learning from Bhagwan's excellent lectures and inspired by His spiritual vision my work with students improved very much and their ability to be creative increased.

For me Bhagwan's teachings and insights offer much more than any scientific research in that field could give me.
