Hi,

I wanted to express my gratitude and love and admiration for Bhagwan Shree Rajneesh.

In 25 years in Wall Street, I have achieved financially + in prestige with a 4 year retirement in the middle. But only in the past two years since being connected to Bhagwan have I known the joys and sorrows, wins and losses of my co-workers and clients in their estimation. The joy and satisfaction that ~~at~~ those who deal with me daily and I have had in the past year or more is far far beyond anything I imagined possible - I am continually shocked, surprised and delighted at many clients and fellow workers interest in the spiritual side of my life and their revealing hidden similar yearnings and dreams - I have sent out over 100 books written by Bhagwan to business associates and their gratitude and pleasure in reading these books encourages me even more to share His gift. And let me assure you, (as my clients and co-workers reflect to me) that in the past two years I execute my functions and financial guidance of large institutions with greater sense of responsibility, wisdom and lightness within responsibility than ever before - I am

more productive today than ever before in my work life, even though I was a managing partner of a major firm 14 years ago. My peace and serenity has come mostly from his energy, teaching + love and I hope that many others can have this gift

Werner Mendel
