

Dear Sir,
This letter concern the difficulties The IWS give To Bhagwan Shree Rajneesh of being able To stay here in United States. I cannot understand The opposition of the government about it.

Bhagwan Shree Rajneesh is for me and I can say by experiencing his teaching and way of living loving and meditatively, the greatest master that never comes on the earth. After Four years studying in Philosophy and seven years studying and practicing in art and pottery I can say that nothing gave me so much insight energy and inspiration and discipline in my production since I become his disciple.

Bhagwan Shree Rajneesh is involve in science and art as much as Religion. Everything is part of The same whole. For him there is no opposition between The art, Science and Religion. His great intelligence, his deep comprehension and loving way of living in everything in life, give to To This world and opportunity to grow in consciousness, love and understanding about the realization of the human being.

You can see when you come to Rajneeshpuram how much is done everyday with so much creativity, how the city becoming more and more beautiful and productive, how everything is done with love, care and deep understanding about The ecology. There is a great intelligence and care behind-

This Bhagwan Shree Rajneesh is a yug about everything.

His teaching now is no more concerned with the words but is more in experiencing in the day to day of life.

His way of talking before about the truth, love, meditation, is now of living and experiencing it here and now in Rajneeshpuram and in the Rajneesh meditation centers and communes all around the world. This become a space for growing as sannyasins.

Please Sir, give the opportunity to this great genius and master to live here in America as well as he need to be.

Ma Anand Samudra
