

Heerde August 4 1983

To whom it may concern,

In July I visited Rajneeshpuram, Oregon during the Second Annual World Celebration in the presence of Bhagwan Shree Rajneesh. This letter I write because I strongly feel that here a very important experiment is happening. For this Bhagwan is the beginning and the end. I myself live in a commune in Holland and here we try to create the same sphere as in Rajneeshpuram. This has influenced my whole life in a positive way. I myself feel closer to nature and more in harmony with myself and with others. In this meditation is a very important aspect. In all this the guidance of Bhagwan is essential. For this I ask the authorities of U.S.A. to allow this man to stay in America so he can do his immensely beautiful and important work for humanity in common.

Yours sincerely
